

Alerting

Alerts and tracking tools, like everything else on our platform, are included as part of your comprehensive Knowledge Mosaic® license. Set up as many alerts as you like—there is no limit, and there are no extra or hidden charges.

Custom, real-time query alerting is now available for almost all the primary data and guidance materials on our platform

Our **state-of-the-art customizable alerts system** is built on a new core architecture to ensure the utmost in speed, comprehensiveness, precision and reliability.

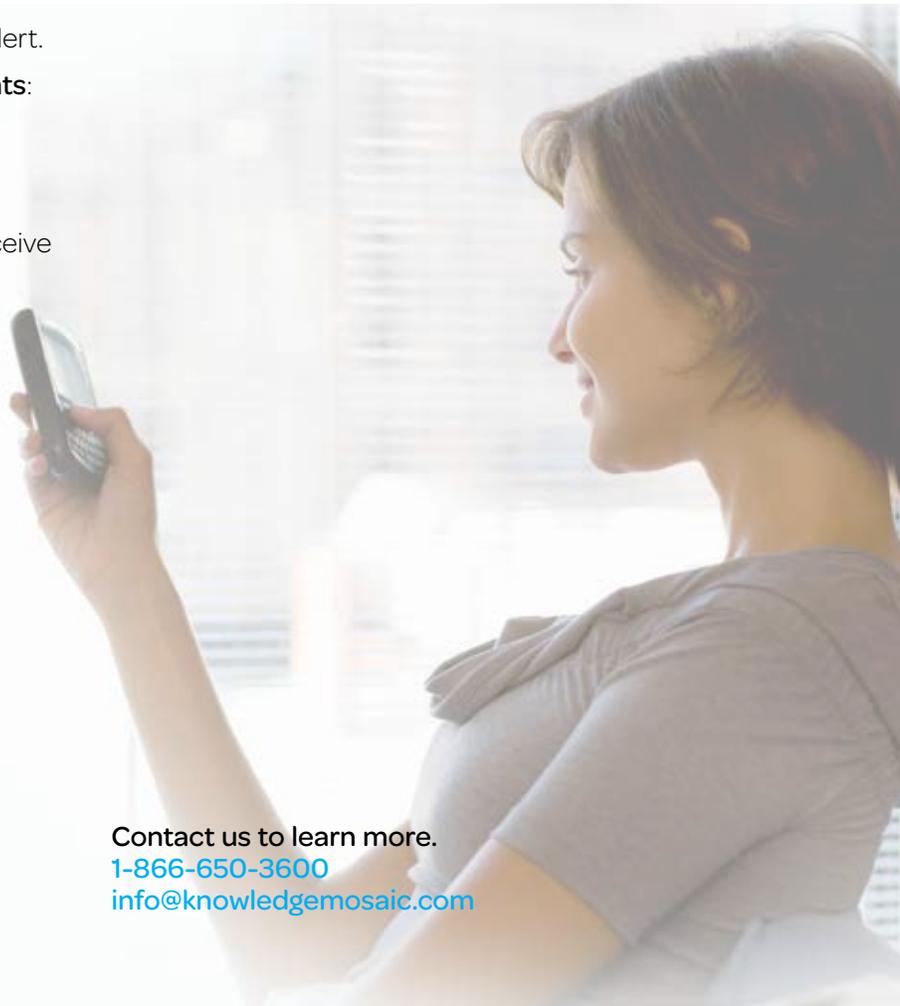

The highlights:

- All alerts offer **advanced text search capability** (Boolean and/or relevancy searching) and other category filters. In fact, you set up your alerts directly from the corresponding search pages on the research platform—the available search fields and functionality for research and alert configuration are identical.
- Alert emails include **Keyword-in-Context (KWIC™) highlighting**.
- Include up to **ten additional recipients** to each alert.
- For each alert, choose from **three delivery formats**: real time (an alert is emailed immediately), daily bundled or weekly bundled.
- You also have the option of setting up your query alert as an **RSS feed**, allowing you to deliver or receive real-time information in widgets, dashboards and mobile apps.

Rulemaking trackers

Knowledge Mosaic offers two **rulemaking trackers** to help you keep pace with agencies' implementation of two of the major pieces of federal legislation signed into law by President Obama.

- Our **Dodd-Frank Rulemaking Tracker** helps you keep pace with the torrent of rulemaking generated by the sweeping Dodd-Frank Wall Street Reform and Consumer Protection Act.
- Our **Affordable Care Act Rulemaking Tracker** lets you follow implementation of the two major laws related to health care reform—the Patient Protection and Affordable Care Act, as amended by the Health Care Education and Reconciliation Act of 2010—collectively known as the “Affordable Care Act.”
